Muhammad **Bilal**

Frontend Developer | React Js | JavaScript |CSS |Material UI

A dynamic front-end developer with a background in electrical engineering and a deep Passion for Web development. Combining my technical expertise and creativity, I have Successfully transitioned into the world of coding to craft captivating portfolio websites. Through dedicated learning and Hands-on experience, I have honed my skills in HTML, CSS, JavaScript, and various frameworks. With a problem-solving mindset and meticulous Attention to detail.

WORK EXPERIENCE

Frontend Developer - Fiverr,

React Js Developer   01/2022

- Website Design and Development: Collaborated with clients to Understand their requirements and design visually appealing and user-friendly websites using HTML, CSS, and JavaScript.
- Responsive Web Development: Ensured that websites were fully responsive and optimized for different devices and screen sizes, Providing a seamless user experience across platforms.
- Version Control and Collaboration: Utilized Git and GitHub to manage code versioning, collaborate with clients, and maintain a transparent development process.

BIN AZIZ BUILTZ, Lahore Pakistan

Electrical Engineer   06/2021 – 06/2022

- Designing and developing electrical systems: Creating electrical schematics, diagrams, and layouts to design and develop electrical systems, components, and equipment
- Ensuring compliance with codes and standards: Applying knowledge of electrical codes, regulations, and industry standards to ensure designs meet safety and performance requirements
- Testing and troubleshooting: Conducting tests, inspections, and evaluations of electrical systems and equipment to identify and resolve malfunctions or issues.
- Collaborating with cross-functional teams: Working closely with mechanical engineers, software engineers, and other professionals to integrate electrical systems into larger projects or products.
- Managing projects: Planning and overseeing electrical engineering projects, including budgeting, scheduling, resource allocation, and project coordination

Projects GIF finder website:

To leverage my skills in web development to build a dynamic and engaging Giphy search Website that Provides users with a seamless and intuitive search experience. My goal is to Create a visually Appealing and Responsive website that allows users to quickly find the Perfect GIFs for their needs. I aim to achieve this by Utilizing my expertise in front-end Technologies like HTML, CSS, and JavaScript, as well as my experience with Front-end Technologies like ReactJS. Ultimately, my Objective is to deliver a high-quality Giphy search Website that meets the needs of users and exceeds their expectation.

Accomplishments:

- Awarded CIIT Endowment Fund at graduation level.
- Awarded Talent Hunt Scholarship at college level.
- Our final year project (**IoT based smart greenhouse**) approved from National Grass root ICT Research Initiative (NGIRI) in 2018
